

ESAILE SIANI DJIAKENG

Junior Software Engineer | Full-Stack Developer

Cape Town, South Africa | djiakengfrank@gmail.com | GitHub: github.com/DjiakengFranck | LinkedIn: www.linkedin.com/in/frank-djiakeng-a73494355 | web: [Djiakeng Franck | Software Engineer](#)

PROFESSIONAL PROFILE

Junior Software Engineer with a strong foundation in software development, Java, Python, JavaScript, SQL, databases and modern web development. Experienced in building practical applications through academic, independent and professional development work, including React-based interfaces, Supabase-backend systems, API integrations and Google Maps functionality. Currently developing professionally while continuing to strengthen full-stack, backend, cloud and system-design skills. Motivated to contribute to a professional engineering team and grow through real-world software development.

TECHNICAL SKILLS

Programming	Java, Python, JavaScript, SQL, HTML, CSS
Frontend	React, Vite, React-Bootstrap, Responsive Web Development
Backend / Data	Supabase, MySQL, Apache Derby, Database Integration, APIs
Cloud	AWS (Lambda, S3, CLI), Microsoft Azure
Development	Git, GitHub, VS Code, IntelliJ IDEA, PyCharm, NetBeans
Software Engineering	OOP, MVC, Data Structures & Algorithms, System Design, Documentation
Design	UI/UX, Wireframing, Figma, GUI Design (Java Swing)

PROFESSIONAL EXPERIENCE

Software Developer — AppManiazar

2026 – Present

- Developing and maintaining React-based frontend applications using reusable components and modern JavaScript practices.
- Contributing to application features, debugging, integration and deployment workflows.
- Working with Git/GitHub and collaborative development practices.
- Applying software-development principles to real-world application requirements.

Junior Developer Intern — Pixel Voice Technology

2021 – 2022

- Developed and maintained responsive web applications.
- Wrote, tested and debugged front-end and back-end code.
- Integrated databases and APIs to support application functionality.
- Optimized performance and supported cross-browser compatibility.
- Collaborated using version control and team development practices.

SELECTED SOFTWARE PROJECTS

WC-Connect — React · Supabase · Google Maps · JavaScript

ISP/community connectivity platform. Implemented community and suburb search, location autocomplete, active hotspot discovery, Google Maps integration, browser geolocation, voucher packages and secured Supabase data access.

Digital Portfolio — React · Vite · React-Bootstrap

Personal software-engineering portfolio presenting professional experience, skills, certifications, journey and selected projects, with responsive navigation, contact interaction and resume functionality.

ROSINE&CO Beauty Salon — React · JavaScript · CSS · Vite

Unisex beauty salon website. Designed and developed a modern responsive interface showcasing salon services, beauty products, gallery, brand story, contact information and gift cards, with animated sections and a premium light-themed visual experience.

eduConnect — Academic Capstone Project

Student-focused academic software project developed as part of the CPUT ICT Application Development programme.

Medical Landing Page — Web Development

Responsive landing-page project focused on presenting a professional healthcare-oriented web experience.

Enrolment Management Application — Java · Apache Derby · OOP · MVC · GUI

Student enrolment system enabling administrators to manage students and courses while students register subjects.

EDUCATION

Cape Peninsula University of Technology (CPUT) — Diploma in ICT: Application Development (DPICT), 2024–2026

Higher Certificate in ICT (HCICT) — 2020 - 2021

Oude Molen Technical High School — National Senior Certificate, 2018

CERTIFICATIONS

- Learning Git and GitHub — LinkedIn Learning
- UX Design 1–3 — LinkedIn Learning
- Introduction to IT Architecture — LinkedIn Learning
- Database Foundations — LinkedIn Learning
